

CAROLINA CUSTOM PRODUCTS

Our 3/4" adapter plate allows you to switch **FROM THIS...**

...TO THIS, in under a minute or vice versa!

We manufacture three **Hotshot Transporter** kits that give you the options needed to get the job done. A transporting platform that utilizes four of the most common towing applications used today.

The Hotshot Transporter kit comes standard with a patent pending 3/4" steel adapter plate system. The adapter plate is designed to receive the 2-5/16" 30k Goose-ball **OR** it can utilize our engineered, 40k rated **Commander Mini 5th wheel**. This system offers a process that takes less than **ONE** minute to convert from a 2-5/16" ball to a mini 5th wheel!

The ICC bumper offers an integrated 2.5" 18k receiver and the back plate is pre-drilled to accept a 12 ton pintle hitch. This should cover **ALL** your towing needs!

HOTSHOT TRANSPORTER SYSTEM

Our Commander System is patent pending & industry **TESTED** to ISO 8717 standards
